Keyboard controls

Stations

F1	Gunner
F2	Commander
F3	Cupola
F4	Driver

Hull and turret

C	Switch hull / turret control
A	Align turret with hull
Up / KP8	Forward / raise sight
Down / KP2	Reverse / lower sight
Left / KP4	Turn left
Right / KP6	Turn right
KP5	Stop hull / turret

Gunner

Enter	Cycle available targets
L	Lock selected target
Space	Fire selected weapon
M	Fire machine gun
1 / 2 / 3	HEAT / sabot / AX
S	Smoke
Z	Sight: normal, 3x, 10x

Gunner & commander

T	Thermal imaging
R	Retrieve waiting radio message

Commander

D	Damage screen, any key returns
Z	Map: close-up / overview
F7	Current turret bearing
F8	Scan +90 degrees
F9	Scan +180 degrees
F10	Scan +270 degrees

Session

Esc	Pause / back, any key resumes
Q	Quit sequence
F5	Sound on / off
Shift+3	Original system speed

Remaster shortcuts & menus

Desktop macOS uses Command. Windows, Linux and the browser use Control + Alt. These remaster shortcuts remain separate from original game commands. On Windows keyboard layouts where AltGr+S, L or G types a character, use the Session or Graphics menu instead.

Desktop macOS	Windows / Linux / Browser	Action
Cmd + S	**Ctrl + Alt + S**	Quick save, slot 1 (press again within four seconds to overwrite an existing save)
Cmd + L	**Ctrl + Alt + L**	Quick load, slot 1
Cmd + Shift + L	**Ctrl + Alt + Shift + L**	Undo last load
Cmd + G	**Ctrl + Alt + G**	Cycle graphics
Tab	**Tab**	Toggle 8x / normal speed

Session, graphics & help

Press Tab to toggle 8x fast forward and normal speed. Session provides five save slots and Undo last load. Graphics offers EGA, EGA Upscaled (original colours), Genesis (optional ROM), Genesis Upscaled, Modern (Modernized) and Tactical, the default view. HUD Style chooses Tactical (default) or Restored independently. Help opens the offline controls and field guide. Audio is muted during fast forward.

Menus, context & original creators

Menus and briefings

Enter	Choose mission, day/night or skill; submit names or identification; advance credits and briefings.
Space	Advance past a mission-title screen.
Left / Right	Adjust ammunition in the Motor Pool.

Movement

Arrow keys and keypad control the hull or turret selected by C. Hull forward and reverse move the tank; turret mode raises and lowers the sight.

Scan and zoom

Gunner Z changes magnification. Commander Z changes map scale. Commander scan is relative to turret bearing.

References and saves

Pause with Esc if you want the simulation to wait while reading. Help sends no extra game command. Release held keys after returning. Save states restore the machine and campaign disk; back up your profile before upgrading. Restore full-quality defaults returns to 4x MSAA and 16x anisotropic filtering, keeping the selected graphics mode, HUD and audio mix.

Original game by Dynamix

Published by Electronic Arts

Director and design: Damon Slye

Simulation: David McClurg

Product shell: Richard Rayl, Greg Volkmer

Artistry: Kobi Miller, Cyrus Kanga
